

**SAFETY WARNING - PLEASE READ CAREFULLY**

WARNING - Be certain electrical power is OFF before and during installation and maintenance.

WARNING - Risk of fire and/or electric shock.

WARNING - Risk of fire or electric shock. For install by qualified electrician only. Do not attempt installation if not qualified.

WARNING - Risk of fire or electric shock. Install this kit only in the luminaires that have compatible construction.

WARNING - Verify that supply voltage is correct by comparing it with the luminaire label information.

WARNING - To prevent wiring damage or abrasion, do not expose wiring to edges of sheet metal or other sharp objects. All wiring connections should be capped with UL approved wire connectors.

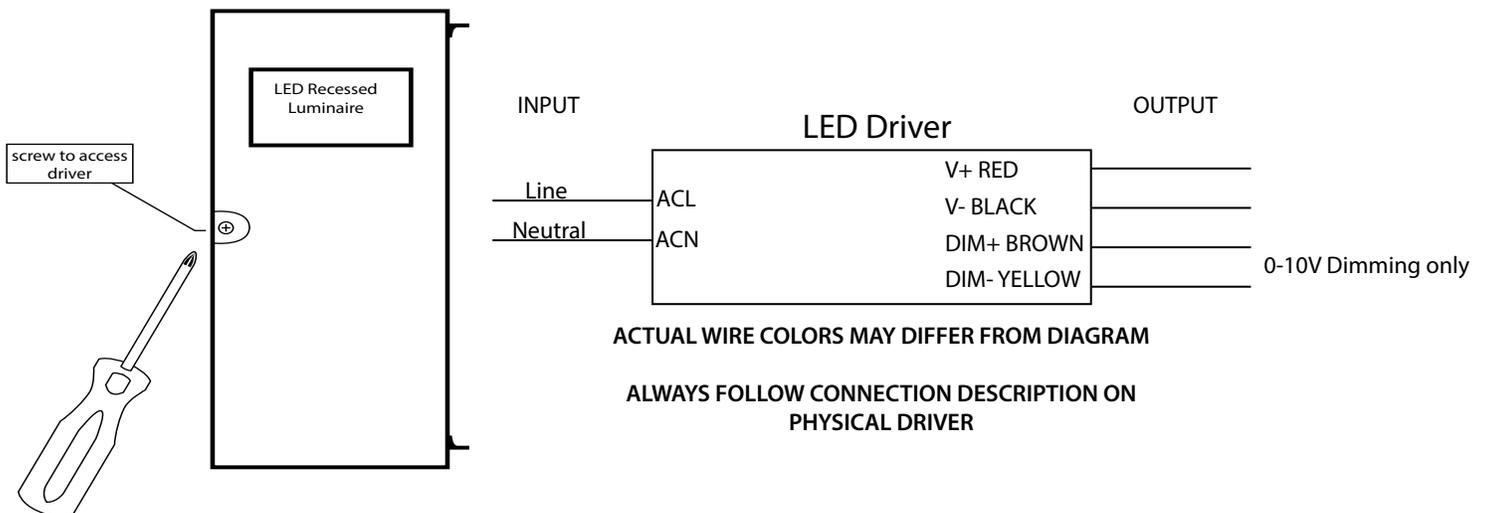

WARNING - Wear gloves and safety glasses at all times when removing luminaire from carton, installing, servicing or performing maintenance.

**Included Parts**

- A. (1) LED Flat Panel
- B. (4) Airplane cable hang wires [optional]
- C. (4) Airplane cable screws [optional]

**Maintenance**

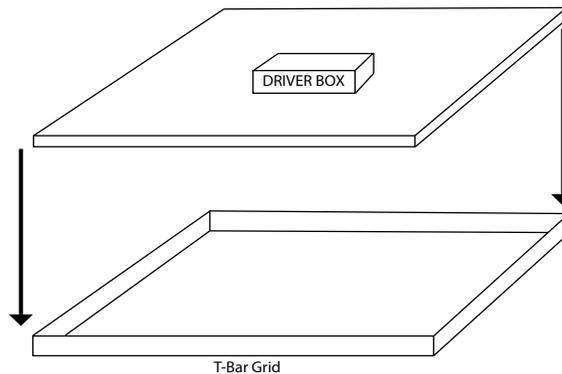

Perform visual, electrical, and mechanical inspections on a regular basis. The environment and frequency of use should determine this. However, it is recommended that checks be made at least once per year. After turning off the main power, check the electrical system to ensure all connections are clean and tight. Mechanically check that all parts are properly assembled.

**Recessed Mounting Installation:**

1. Turn off all power before installation.
2. Feed power cable into driver box and hard wire the driver. See bottom diagrams on page 1 for driver access and wiring details.
3. Insert LED Panel Lamp into T-Bar grid, face down. See Figure 1.
4. For additional security, use fixture clips to secure the panel lamp to grid structure.

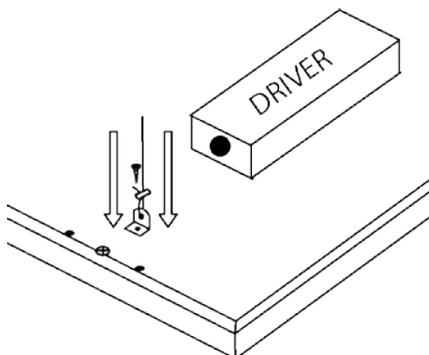

**Figure 1.**

**Suspended Mounting Installation:**

1. Turn off all power before installation.
2. Using the included screws, attach cable brackets to backside of LED Panel Lamp. See Figure 2.
3. Measure appropriate wire length, and feed excess wire through gripper. See Figure 3 (A).
4. Mount hanger cables to ceiling. See Figure 3 (B).
5. Feed power cable into driver box and hard wire the driver. See bottom diagrams on page 1 for driver access and wiring details.
